NOW AVAILABLE FOR DOWNLOAD

UNIFORM EUROPEAN TRAINING RECORD BOOK FOR INLAND SHIPPING

Dear members,

We have great news for our Edinna-members and for all inland waterway navigation schools and training institutes: the uniform training record book for the European inland navigation sector is now available for download!

The documents can be found at the website of Edinna, follow ([this link](#))

May we please ask you to spread these documents within your institute or organisation?

The European Training Record Book is designed in such a way that students and supervisors can easily work with it. There are two versions available, one on operational level and one on management level. The file type is pdf and the document contains ample adjustable input fields and check off lists.

The record book anticipates the European directive which prescribes competence based education and training from January 1st, 2022. The new European Training Record Book provides a manual for traineeships and a means for recording the competences and skills learned by new crew members.

In the COMPETING project, seven competencies and the accompanying teaching materials are being worked on, both at operational and management level. These include navigation, ship operation, cargo handling, stowage and passenger transport, maritime engineering and electrical, electronic and control engineering, maintenance and repair, communication and health, and safety and environmental protection. The teaching materials will be made available later this year.

We will keep you informed on all developments. In the meantime, if you have questions, do not hesitate to contact us.
